WATER SOFTENERS

AQUATEK ATWS-SERIES WATER SOFTENERS

INNOVATIVE WATER PRODUCTS

How it works: Aquatek water-softening systems remove calcium and magnesium ions from hard water by replacing them with sodium ions through a process called *Ion Exchange*. Calcium and magnesium, the two key culprits of hard water, are both positively charged molecules. As the hard water pumps through the softening system, it passes through a bed of negatively charged resin beads the opposites attract. The mineral deposits cling to the resin and the now-softened water exits the softener tank and flows throughout the house.

Benefits: Calcium and magnesium ions interfere with household soaps and detergents, but sodium does not. The water-softening process thus helps detergents to more effectively remove dirt and oils from clothing and dishes. It also helps soaps to give a "slippery" & soft feel to your skin when you wash. Ultimately reducing your soap & detergent usage by up to 50%! Additionally saving you even more money by improving hot water heater efficiency and greatly extending the life of your household appliances.

ATWS CONNECTED SERIES

EZSALT Wireless Salt Sensor!

WIRELESS SALT SENSOR

A smart, level-sensing device specifically designed for your water softener. Get low salt level alerts, check your salt levels from your phone, and never run out of salt again. The EZsalt Sensor connects to Wi-Fi to deliver low salt alerts to your smartphone, wherever you are. Customize your alerts to send at a certain salt level and choose how you prefer to be notified. In areas where salt delivery is available, you can share your salt readings with a local company so they can deliver salt to you before you ever run out.

FEATURES

- Conveniently view all valve settings and status
- Easily change valve settings
- View current water usage information
- Graphically view water usage history
- Start a regeneration or backwash cycle from your phone or tablet
- Set/view the servicing water treatment dealer information
- Better understand how the system is working
- Programming ease and options increase efficiency, save salt & water
